

# AL PROTECTION SUSTAINABLE ROOF RESTORATION SOLUTIONS

Replacing a roof can be particularly costly and problematic for your business. So why wait until it's too late?

## AN INNOVATIVE SOLUTION

This restoration process involves applying a liquid sealant which, when hardened, forms a new waterproof membrane without welding, cracks or voids on the actual roof. This new waterproofing membrane will give your roof a new life. It will prevent water infiltration and air leaks, while maintaining the aesthetics of your installations.

“

*You can protect your investments today and extend the life of your roofs. Give them a second life with our sustainable restoration solutions, without replacing them entirely.*

## FOR ALL YOUR ROOFS

This waterproof membrane is suitable for your roofs, whether they are metal, elastomer, TPO, PVC or EPDM adhered.

Perfectly suited to Canadian climatic conditions, these coatings are effective in the most extreme temperatures, winter and summer, daily UV exposure, heavy rain, as well as snowfall and frost.

### LONGER LIFESPAN UP TO 25 YEARS

Our liquid membranes form a shield that stops aging and regenerates your roofs in a sustainable and economical way.

### 80% SAVINGS

Our technology allows you to save up to 80% of the cost of a complete replacement.

### GUARANTEE UP TO 20 YEARS

Get an extended manufacturer's warranty on materials and labor for up to 20 years.

### ENVIRONMENTAL PROTECTION

By choosing our process, you limit polluted materials dumping in landfills.

### UV PROTECTION

By transforming your roof into a white opaque surface, the coating will reflect 95% of solar radiation, effectively limiting heat build-up inside buildings.

### STOP DEGRANULATION

The coating freezes the remaining granules and protects the membrane in place to prevent premature aging.
